

Program to sort strings in alphabetical order.

Algorithm

1. Start
2. Input to sort strings in alphabetical order
3. temp i, j
4. $n = \text{strlen}(\text{string})$;
5. for ($i=0$; $i < n-1$; $i++$)
{
 for ($j = i+1$; $j < n$; $j++$)
 {
 if ($\text{string}[i] > \text{string}[j]$)
 }
}
6. temp = string[i]
 string[i] = string[j]
 string[j] = temp
7. Output the sorted strings
8. stop.

Flowchart
