

C program to find smallest and biggest element in an array.

Algorithm:

1. Start
2. Input array elements.
3. Repeat from $i = 2$ to n
4. if ($arr[i] > large$)
5. $large = arr[i]$
6. if ($arr[i] < small$)
7. $small = arr[i]$
8. Print small and large.
9. stop.

Flowchart
